**BONUS free online digital slideshow worth \$250**

*Most couples choose my midi or extended packages, but if you are having a small registry service or an elopement party then my Lite package can cover the bases and give you some nice images of the day without breaking the bank. You can always book a Lite package and upgrade before or on the day.*

## Extra Add-ons

### Video \$350

Hiring a videographer can add another \$2000+ to the cost of your day and trusting Uncle John with his ipad can be a little bit hit and miss.

If you are just wanting to capture ceremony or reception speeches in a simple, no fuss way I can set up and monitor a video camera with directional mic on a tripod to catch the important bits. I supply the finished and edited video on a playable dvd for instant family viewing along with an extra copy to share with family.

NB. This is not fancy pants professional videography. It is simple one angle capture with reasonable picture and sound quality and no fancy effects.

### Instant cameras and album \$350

Photoboosts start at around \$600 and go up to \$1500 ish.

Give your guests a fun experience at the reception with this add-on for much less cost.

**This add-on is only available if you hire me for my extended package.**

I will provide Instax 8 instant cameras, 100 x wallet sized instant film prints, a glue pen, a silver writer and a plain paper album. Simply set up a table out of the way and let your guests snap a photo of themselves, glue it in to the guest book and write you a note.

Add to the fun by going to the \$2 shop and purchasing some wigs and moustaches.

I'll keep an eye on the table, refill the camera with film, change the batteries, and hand you the completed book at the end of the night.
