

The Airstream Project by Pure Cruise

Matt and the team have designed, and hand built a totally unique 9.2-meter pontoon vessel specifically for charter on Lake Rotoiti - the shape, form and finish draws its inspiration from classic 1960's Airstream trailers, second world war aircraft and Italian speed boats!

The Airstream Project – A one of a kind, floating work of art!

Exclusive charters are tailored by your skipper/guide to suit your preferences on the day. Visit the geothermal hot water beach to sink your toes in the warm sand, view old Māori hand carved food storage caves on the shore or bathe in the lake edge hot pools all only accessible by the water. The adventurous among you may like the large tree's to leap from into the fresh waters or wade into caves from the boat and experience glow worms during the day! Be as active or relaxed as you like while exploring beautiful Lake Rotoiti on this totally unique vessel. *Pure Cruise - an off the beaten track indulgence that is unmistakably New Zealand.*
